CAS CONSULTING IS EXPANDING

(San Antonio, TX) – CAS Consulting & Services, Inc. is pleased to announce the opening of an office in San Antonio, located at 700 E. Sonterra Blvd. Suite 1206. CAS provides civil, transportation, and environmental engineering services.

“We are excited about our opening our San Antonio office. First of all, San Antonio is such a great city. Secondly, this will allow us to participate in new arenas, such as federal projects, and expand our water and transportation opportunities,” says CAS’ Chief Executive Officer, Channy Soar.

CAS is currently searching for qualified engineers in the San Antonio area for its San Antonio office.

Some of the projects that CAS is working on include the SH130 Toll Road, Texas Department of Transportation San Antonio Evergreen project, and I-35 improvements.

###

CAS Consulting & Services, Inc. provides engineering consulting services in the State of Texas. CAS professional engineers are experienced in the areas of wastewater engineering, water resource management, stormwater management, environmental engineering, construction management, and transportation design services. Our vision is simple: “to provide professional, technical services in a manner which exceeds our customers’ expectations.” CAS is a DBE, MBE, and HUB certified firm. CAS is also pre-certified with TxDOT in multiple categories.
